### Towers Perrin and Tillinghast Software Solutions Collaborate with Distinct to Maintain Market Leadership

#### Industry/Market

Insurance & Financial Services

#### Business Challenge

Tillinghast Software Solutions are the creators of the global market leading financial modelling software, MoSes, currently used by some of the largest and most reputable finance and insurance firms in the world.

To overcome some of the challenges associated with maintaining a high performance, high quality, industry leading software application Tillinghast has recruited the help of Distinct to lead the .Net migration project.

#### Distinct Solution

Distinct was chosen to lead a global team at Tillinghast to redevelop, migrate and enhance the elements and functionality of an outdated technology to a superior Microsoft .NET platform. Distinct's understanding of industry best-practice, in which architectural scalability, maintainability, test engineering and quality standards are planned and implemented, was instrumental to Distinct's selection to lead this project.

#### Benefits

- Superior software performance and quality through the application of expert knowledge.
- Greater capacity to respond to future technological demands.
- Introduction of predictable development based around an agile development cycle designed for CMM level 3 compliance.
